

### Features

- Ultra low quiescent current: 3.5 $\mu$ A (typ.)
- High input voltage (up to 12V)
- Output voltage: 1.8V, 2.5V, 2.7V, 3.0V, 3.3V, 3.5V, 4.15V, 5.0V
- Output voltage accuracy: tolerance  $\pm$ 3%
- Maximum output current: 250mA
- Low dropout voltage
- Low temperature coefficient
- 3-pin SOT89 package

### Applications

- Battery-powered equipment
- Voltage regulator for microprocessor
- Voltage regulator for LAN cards
- Wireless Communication equipment
- Audio/Video equipment

### General Description

The HT73xx series is a set of three-terminal, low power, high voltage regulators implemented in CMOS technology. The series features extremely low quiescent current which is typically 3.5 $\mu$ A. They allow input voltages as high as 12V. The device provides large current with a significantly small dropout voltage.

The HT73xx consists of a high-precision voltage reference, an error correction circuit, and a current limited output driver. They are available with several fixed output voltages ranging from 1.8V to 5.0V. CMOS technology ensures low dropout voltage and low current consumption. Although designed primarily as fixed voltage regulators, these devices can be used with external components to generate variable voltages and currents.

### Selection Table

| Part No. | Output Voltage | Package | Marking            |
|----------|----------------|---------|--------------------|
| HT7318   | 1.8V           | SOT89   | 73xx-A (for SOT89) |
| HT7325   | 2.5V           |         |                    |
| HT7327   | 2.7V           |         |                    |
| HT7330   | 3.0V           |         |                    |
| HT7333   | 3.3V           |         |                    |
| HT7335   | 3.5V           |         |                    |
| HT7341   | 4.15V          |         |                    |
| HT7350   | 5.0V           |         |                    |

Note: "xx" stands for output voltages.

**Block Diagram**

**Pin Assignment**

**Pin Description**

| Pin No.<br>SOT89 | Pin Name | Description |
|------------------|----------|-------------|
| 1                | GND      | Ground pin  |
| 2                | VIN      | Input pin   |
| 3                | VOUT     | Output pin  |

**Absolute Maximum Ratings\***

Supply Voltage .....  $V_{SS}-0.3V$  to  $V_{SS}+14V$       Power Consumption .....500mW  
 Storage Temperature ..... $-50^{\circ}C$  to  $125^{\circ}C$       Maximum Junction Temperature .....  $150^{\circ}C$   
 Operating Temperature ..... $-40^{\circ}C$  to  $85^{\circ}C$

Note: These are stress ratings only. Stresses exceeding the range specified under "Absolute Maximum Ratings" may cause substantial damage to the device. Functional operation of this device at other conditions beyond those listed in the specification is not implied and prolonged exposure to extreme conditions may affect device reliability.  
 The guaranteed specifications apply only for the test conditions listed.

## Electrical Characteristics

Note: "\*" Regulation is measured at constant junction temperature, using pulsed ON time.

"\*\*" Dropout is measured at constant junction temperature, using pulsed ON time, and the criterion is V<sub>OUT</sub> inside target value ±2%.

**Application Circuits**

## Package Information

Note that the package information provided here is for consultation purposes only. As this information may be updated at regular intervals users are reminded to consult the [Holtek website](#) for the latest version of the [Package/ Carton Information](#).

Additional supplementary information with regard to packaging is listed below. Click on the relevant section to be transferred to the relevant website page.

- Package Information (include Outline Dimensions, Product Tape and Reel Specifications)
- The Operation Instruction of Packing Materials
- Carton information
